SUMMARY

New Grad Software Engineering student specializing in Distributed Systems and Web development with **2+** years of project experience in developing, maintaining, and testing large-scale applications.

EDUCATION

San Jose State University, San Jose, CA Jan 2022 – Dec 2023(Expected)
Master of Science in Software Engineering **3.78 GPA**
Relevant coursework: Distributed Systems, Software Systems Engineering, Machine Learning, Business Intelligence
Vardhaman College of Engineering, Hyderabad, India Aug 2015 – May 2019
Bachelor of Technology in Computer Science and Engineering **3.72 GPA**
Relevant coursework: Data Structures, Cloud Computing, Operating Systems, Design Patterns, Codepath

SKILLS

Languages: Python, Java, JavaScript, HTML/CSS, Go, SQL, GraphQL, Bash
Frameworks: Flask, Django, Node.js, React.js, Next.js, Flask, Django, FastAPI, REST API, gRPC
Cloud Infrastructure: AWS, Heroku, Docker, Kubernetes, Terraform, Elasticsearch, Git CI/CD
Data and Machine Learning: Langchain, Huggingface, Tensorflow, Pytorch, Tableau, PostgreSQL

EXPERIENCE

Wipro Limited, Bengaluru, India: Software Engineer Jun 2019 – Dec 2021

- Improved the analytics dashboard using **React.js**, resulting in a remarkable increase in user engagement with an estimated impact of **one million** user interactions
- Automated metric jobs by deploying RPA bots for handling **API** requests reducing manual efforts by **85%**
- Collaborated with cross-functional teams to build a hybrid framework utilizing **Selenium, Java** and successfully migrated **200+** contracts from Oracle to Salesforce streamlining contract management processes

PROJECTS

Stack Overflow clone| React.js, Node.js, Express, SQL, MongoDB, Kafka, AWS Spring 2022 – Summer 2022

- Developed a 3-tier web application to emulate features of Stack Overflow, achieving a **50%** reduction in response time and successfully handling **10,000** concurrent users using MERN stack and RESTful APIs
- Implemented **Kafka** topics for badge calculations, ensuring asynchronous processing, efficient data storage and retrieval by partitioning of database schema among **MySQL, MongoDB** and scoring the highest grade in the class

Travel Planner| Javascript, Node.js, Express, Passport, MongoDB, GPT4 Spring 2023 – Summer 2023

- Deployed a centralized Web platform that provides a baseline framework for **trip planning**, with trip creation, management and notes features for newbie travellers
- Integrated **OpenAI API** for trip planning details and created a dashboard to view and modify trip information

Flight Delay Predictor| Python, Flask, React.js, AWS S3, Tableau Spring 2023 – Summer 2023

- Utilized machine learning models to analyze **30 years** of historical data and identified cities with the highest delays and determined the best/worst airports for on-time departures
- Developed a **Single-Page Application** using Flask to provide users with historical data-based travel planning tool

Cloud-Based Virtualization In Distributed Machine Learning Platforms Spring 2023 – Fall 2023

- Collaborated with multiple teams on developing a cloud platform for a fleet of **Sphero robots**, integrating end-to-end components to ensure seamless communication between users, cloud infrastructure, and edge devices
- Developed control functions for the virtual environment using **Mujoco** physics engine and **FastAPI**

OTHER WORK EXPERIENCE

San Jose State University, San Jose, CA: Student Mentor, Student Assistant Feb 2023 – August 2023

- Mentored **20+** international students with multi-disciplinary programs in developing an **AI application** for **Summer in Silicon Valley** program
- Lectured **50+ hours** on technology aspects including Web development, Agile methodologies and SDLC life cycle
